

BLACK KITE

RANSOMWARE SUSCEPTIBILITY INDEX® SPOTLIGHT

Combat ransomware with Black Kite's RSI™.

SEE EARLY WARNING SIGNS

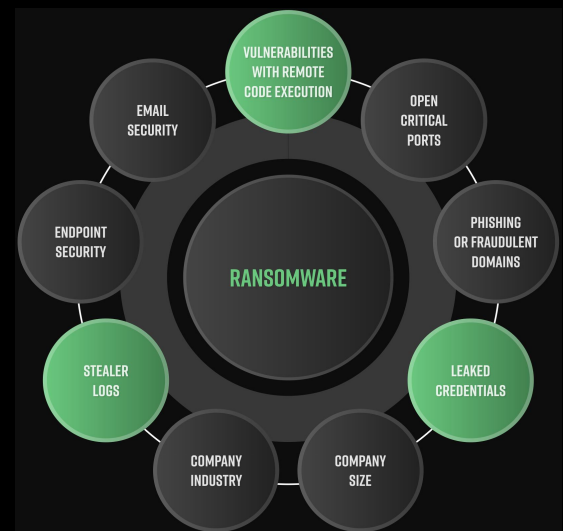

The world's first and only ransomware indication tool.

- Understand which vendors are most prone to ransomware based on statistical analysis of thousands of events.
- Develop an effective course of action for remediation by cross correlating findings with Black Kite's Cyber Risk Assessment.
- Avoid business disruption and increase resilience with risk detection and response.

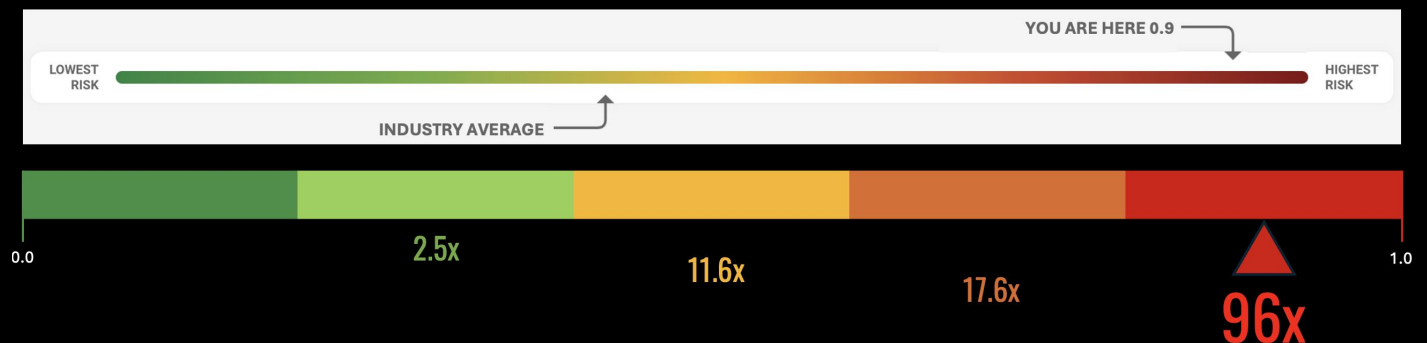

TRUST MULTI-DIMENSIONAL DATA

Intelligence from a hacker's perspective.

- Data is collected from OSINT sources (internet-wide scanners, telegraph channels, hacker forums, the deep/dark web, and more).
- RSI offers specific vulnerability information across eight common indicators of a ransomware attack.

See where you or a vendor ranks to assess the likelihood of a ransomware attack.

In the 0.8-1.0 range, you are **96x** more likely to experience a **ransomware attack** than companies with an **RSI value below 0.2**.
