BLACK KITE'S SERVICENOW TPRM APPLICATION

Black Kite & ServiceNow Solution Brief

Black Kite stands as the premier provider of third-party cyber risk intelligence, delivering unmatched accuracy and comprehensive data. Leveraging the world's largest data lake and employing 290 controls, Black Kite offers a 360-degree view of vendor risk, encompassing technical, financial, and compliance aspects. Innovative features, like the Ransomware Susceptibility Index® (RSI™) and FocusTags™, empower organizations to proactively mitigate threats and make informed, data-driven decisions.

The Black Kite for TPRM integration seamlessly brings this industry-leading intelligence directly into the ServiceNow platform. By embedding multi-dimensional risk assessments, AI-driven compliance mapping, and continuous monitoring capabilities, users can streamline vendor onboarding, automate cyber hygiene evaluations, and gain real-time visibility into their third-party ecosystem, all within their existing ServiceNow workflow.

BLACK KITE

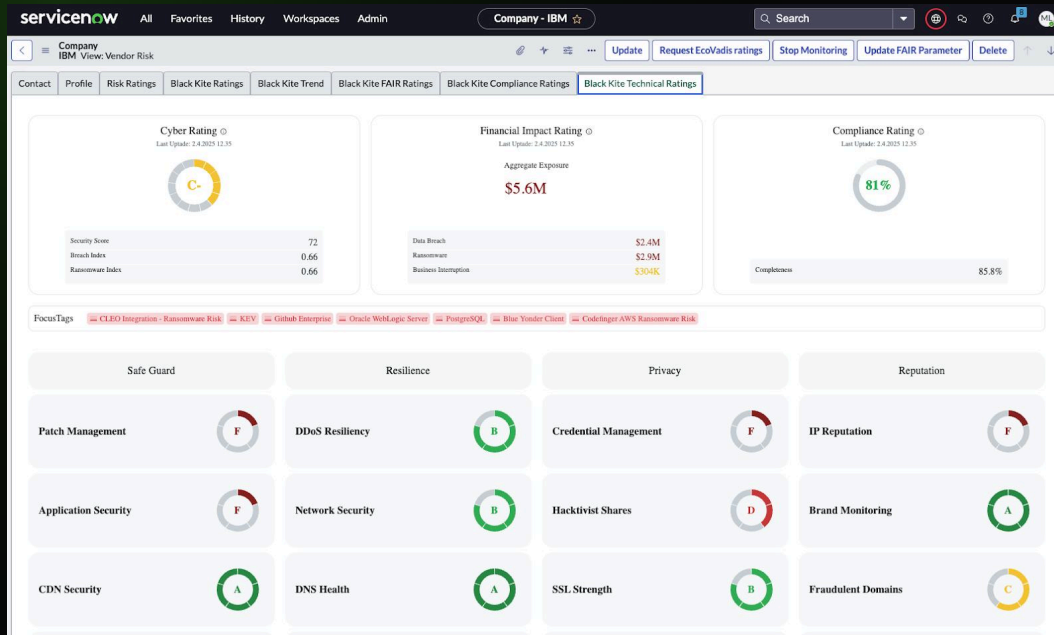

Black Kite is a leading third-party cyber risk management platform fueled by AI-powered intelligence to deliver automated vendor cyber risk monitoring and assessments. With Black Kite, organizations gain always-on visibility and trusted intelligence to act confidently, reducing the exposure and impact of potential third-party threats.

servicenow®

ServiceNow helps customers take control of the third-party risk lifecycle, from onboarding to retirement, reducing risks as the organization builds resilience and compliance across the enterprise. From the Now Platform®, customers can centralize the management of their third parties in one location and automate essential processes.

Joint Solution

This powerful combination delivers significant outcomes for key personas: CISOs gain continuous monitoring and quantified financial risk insights; Practitioners reduce assessment times from months to days, unify workflows, and improve collaboration; and the broader Security Organization optimizes cyber risk management and rapidly responds to emerging threats. By integrating Black Kite's best-of-breed intelligence, ServiceNow TPRM becomes a more robust and efficient solution.

Key Benefits

- Assess & Monitor 100% of your Supply Chain
- Assess Third Parties in Days, not Months
- Proactively Respond to Third-Party Cyber Risk

Better Together

Third Party Risk is a challenge for CISOs to manage across the entire enterprise, whether it's assessing third-party cyber hygiene, proactively responding to zero-day events, or coordinating risk mitigation across multiple teams.

Combining Black Kite's Third-Party Cyber Intelligence with ServiceNow's Risk Management & Security platforms enables CISOs to create sustainable and scalable processes with actionable intelligence to resolve the third-party risk problem at an enterprise scale. With Black Kite's integration in ServiceNow's Third Party Risk Management (TPRM) module, accurate, transparent, scalable, and predictive cyber metrics are embedded throughout the TPRM workflow to understand third-party cyber risk with confidence.

Black Kite is a leading third-party cyber risk management platform trusted by thousands of customers to manage every supplier and every risk across their extended ecosystem.
