

Illuminate risks in your Supply Chain.

IMPROVE VISIBILITY

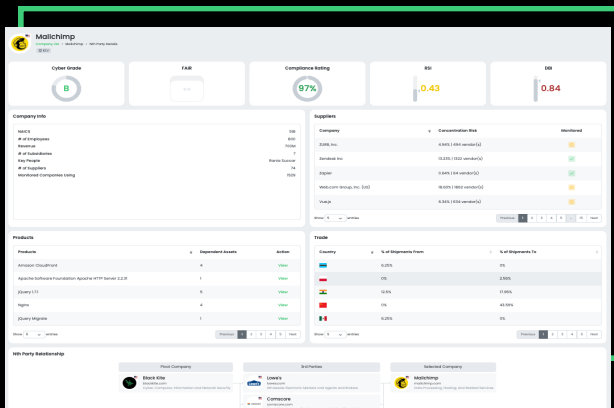

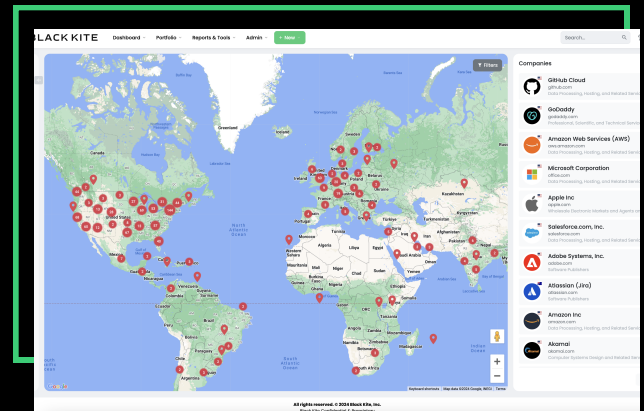

Discover hidden relationships & Concentration Risks

- Supply chains are complex and convoluted. Visibility gives you data and options to drive decisions internally and externally.
- Use Black Kite's *Concentration Risk* metric to identify suppliers that could have outsized impacts on your supply chain.

PREEMPT DISRUPTIONS

Automated response to 4th party security incidents

- Real time identification of 4th parties victimized by incidents.
- Identify how 4th parties link back to your organization to coordinate a response to your 3rd parties.
- Be proactive. Don't wait for your vendors to disclose incidents in their supply chains, but rather lead the response.

MEANINGFUL VENDOR ENGAGEMENTS

Unveil how vendors are processing your data

- Automatic vendor detection means less time asking for supplier disclosures and more time discussing 4th party relationships and risks to your organization.
- Instantly understand the cyber hygiene of your vendors' supply chains by putting them at the center of the analysis using Black Kite's *Pivot Company* functionality.

ADDITIONAL USE CASES & FEATURES

- "Trust but Verify" Contractual Obligations
- Respond to Geo-Political Strife & Natural Disasters
